the book s focus from which the title is derived is taken from revelation 11 18 and opens with the wrath of god continues with the judgment of mankind and closes with the reward of the saints a jewish biblical scholar nativ brings a unique often startling perspective to the book of revelation basing his theories in hebraic concepts not doctrine or dogma nativ takes the reader on an exciting step by step journey through the hebrew texts the original language of the bible and through painstaking analysis breathes new life into the words of the old testament prophets

the apostles and jesus take for example the word armageddon long interpreted as the ultimate battle between good and evil nativ uses his extensive hebrew knowledge to show it is a place not a battle and introduces the ancient hebrew concept of a place of refuge as proof should nativ be correct not only will he change the theology but dictionary definitions as well equally startling is his discussion of revelation chapter nine regarding the opening of the bottomless pit and the release of the awesome creatures within nativ not only explains what they are their origins and their purpose but most surprising the creatures present location as they await the ending of the age perhaps most controversial of all is nativ s answer to the long asked question regarding the identity of the beast and the meaning of the number 666 not only will the reader be dumbfounded by the simplicity of nativ s answer but horrified by the proximity nativ is not dogmatic he does not expect everyone to agree with his study s conclusions but instead challenges the reader to prove him biblically incorrect neither prophet nor the recipient of a great revelation from god nativ s only claim is the wisdom from god to unveil the meaning of the book of revelation in all its complexities

the design and functioning of an information system improve to the extent that the system can handle the questions people ask surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering the purpose of this book is to explicitly examine these relationships chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information

this book constitutes the refereed proceedings of the second mexican international conference on artificial intelligence micai 2002 held in mÃ rida yucatÃ n mexico in april 2002 the 56 revised full papers presented were carefully reviewed and selected from more than 85 submissions from 17 countries the papers are organized in topical sections on robotics and computer vision heuristic search and optimization speech recognition and natural language processing logic neural networks machine learning multi agent systems uncertainty management and ai tools and applications

in this book for the first time scientists from various disciplines and all partners in the fishery chain address the important issues of quality labelling monitoring and traceability of fish the complexity of the european fishery sector the attitudes towards quality labelling gmp and the needs for quality information are presented the progress of implementing traceability schemes from catch to consumer is covered fishermen give their view on gmp on board of their vessels new tools for measuring the quality of the catch and the experience with quality grading of the

landed fish by qim are described attention is paid to recent developments of e commerce of fish via the auctions the possibilities of combining various instrumental methods for measuring fish quality are highlighted a range of contributions on labelling systems industrial standards awards and certification procedures for the quality of fish are included an overview on consumer research on fish in europe is presented in addition papers are covering consumer s responses to fresh fish the evaluation of a promotion campaign for seafood consumption and consumer s opinions towards farmed fish health and food safety the implications of quality labels for the consumers and the influence on their buying decision process are addressed two papers discussing labelling price and packaging as value indicators and the product differentiation for shellfish complete the book
